

LAKSHMI SWETHA NARAPURAM

📍 Hyderabad, India 📞 +91-8919052265 ✉️ lakshmiswetha0048@gmail.com 🌐 LinkedIn

CAREER OBJECTIVE

AI/ML enthusiast and Computer Science Engineering graduate with strong skills in Java, Python, and software development. Hands-on experience building AI applications using LLMs, RAG pipelines, MCP servers, workflow automation, APIs, and vector databases. Focused on AI agents, intelligent automation, and building scalable, practical software solutions for real-world problems.

EDUCATION

Malla Reddy University

Hyderabad, India

Bachelor of Technology – Computer Science & Engineering — CGPA: 9.02

May 2026

TECHNICAL SKILLS

Programming Languages: Java, Python

AI / ML: Machine Learning, Natural Language Processing (NLP), Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, AI Agent Workflows, Model Integration using APIs

Databases: SQL, MongoDB

AI & Automation Tools: n8n, OpenAI API, Claude API, Gemini API, Model Context Protocol (MCP)

Core Concepts: OOPs, SDLC, REST APIs

Developer Tools: VS Code, Git & GitHub, Postman

Soft Skills: Collaborative Teamwork, Analytical Problem-Solving, Adaptability & Time Management

INTERNSHIP

Data Science with Python

Teachnook

Data Science Intern

- Gained hands-on experience in data analysis and machine learning using Python and its libraries, including Pandas and NumPy.
- Worked on real-world datasets to build and evaluate predictive models, strengthening core data science and problem-solving skills.

PROJECTS

Plant Disease Detection & Fertilizer Advisory System | Python, Deep Learning, Flask

2026

- Built an AI-powered plant disease classification system using deep learning (CNN) on leaf image datasets, enabling data-driven decision-making for farmers across 10+ crop types with high diagnostic accuracy.
- Engineered ETL-style preprocessing pipelines and integrated ML modules for fertilizer recommendation, crop suggestion based on soil nutrients, and yield prediction.
- Deployed a Flask-based web application with multilingual support and location-based services, improving accessibility for agricultural users across diverse regions.

AI YouTube Video Summarizer using n8n + LLM Automation | OpenAI API | Python | Automation Workflows

2025

- Built an AI-powered workflow to extract YouTube video transcripts and generate concise summaries using OpenAI LLM APIs.
- Designed end-to-end automation in n8n by integrating transcript extraction, prompt processing, and summary generation workflows.
- Applied prompt engineering, API integration, and workflow automation to streamline long-form video content summarization and information extraction.

CERTIFICATIONS

- Introduction to Python Programming – Coursera
- Introduction to Artificial Intelligence – Infosys Springboard
- Full Stack Development – Workshop
- Programming in Java – NPTEL

INDUSTRIAL COMPETITIONS

- Participated in the CSE Hackathon, collaborating with a cross-functional team to develop innovative software solutions for real-world challenges, demonstrating teamwork and problem-solving under time constraints.
